

AutoCarto 2020

May 20-22 | Redlands, CA

The Cartography and Geographic Information Society (CaGIS) is pleased to announce AutoCarto 2020, to be held May 20–22 on the Esri campus in Redlands, California. Workshops will take place on May 19.

The theme of AutoCarto 2020 is WhereNext, looking at where we are—and where to go next—in terms of meaning, communication, visualization, and reasoning in this new age of automation, robotic revolution, and artificial intelligence (AI).

Cartography and Geographic Information Science, the journal of CaGIS, will publish a special issue with papers from the conference.

The call for extended abstracts and preconference workshop proposals is now open. See <https://cartogis.org/autocarto/call-for-submissions/> for details. The call for posters will be announced later.

Student assistantships, including a \$750 stipend, are available on a competitive basis. See <https://cartogis.org/autocarto/student-assistantships/> for details.
